Online license temporary tag instructions

- A temporary transportation tag must be in your possession while deer hunting.
- Cut the tag along the dotted line
- Write your deer hunting license number on the tag.
- Upon killing a deer, immediately notch the tag with the month and the date of the kill, and the sex of the deer.
- You are not required to have the tag attached to the deer while dragging it from the field, but you must tag it before you load it in a vehicle or leave it unattended.
